

Project 13: Quiz System

Description

This project is a quiz system that allows users to answer multiple-choice questions. The system reads questions from a data source, presents them to the user one by one, and tracks the user's score. After all questions have been answered, the final score is displayed.

Key Technologies

- **Python:** Used for implementing the quiz logic and managing the flow of the quiz.
- **Object-Oriented Programming:** Utilized for organizing the quiz components, including questions and the quiz logic.
- **Concepts Covered:** Data handling, object instantiation, and basic control flow.
- **Unique Features:** Manages a series of questions and tracks the user's score dynamically.
